

**CANADIAN ASSOCIATION FOR  
MUSIC THERAPY  
37<sup>th</sup> ANNUAL CONFERENCE  
MAY 5-7, 2011  
WINNIPEG, MANITOBA**

## **CALL FOR PAPERS**

### **Music Therapy: Return to the Centre**

Music is the centre, the heart of our work. Music brings us together, transcending and celebrating the diversity of our cultures and experience. Music reaches and gives voice to the deepest parts of our selves in harmony with all of life.

We, the CAMT Conference Committee 2011 of the Music Therapy Association of Manitoba, want you to join us here in Winnipeg in the centre of this great land of ours. Come to find the music at the centre of our diverse country and music therapy community, at the centre of those who seek the healing power of music, and at the centre of your self. Come to learn and reflect, to lose yourself in the music, and to find your centre. This is the land of the big sky where there is room for all to make the music from the centre of our being.

We are requesting papers from Music Therapists, health care and creative arts professionals, educators and musicians relating to the “centre” of music and our practice.

- What is the centre of our own work?
- How do we relate to the centre of those we serve and work beside?
- What expands from the centre of music and Music Therapy?
- What is the centre of our profession?
- How does the story of our lives told through music bring us to our own centre?

## **SEND US YOUR PROPOSALS**

We invite you to share your clinical and research perspectives; methods and approaches, insights, reflections and questions with music therapy colleagues from here and abroad. The conference planning committee invites proposals for presentations, workshops or panel discussions that address the theme.

**Please be advised that a poster presentation invitation will follow at a later date.**
